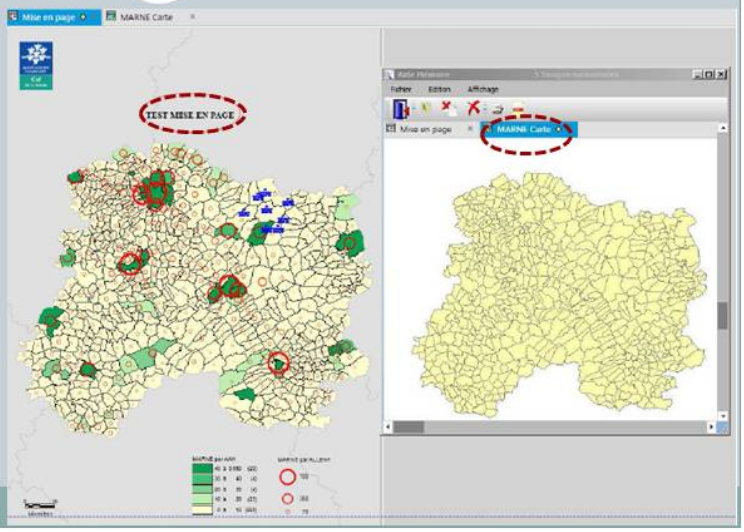
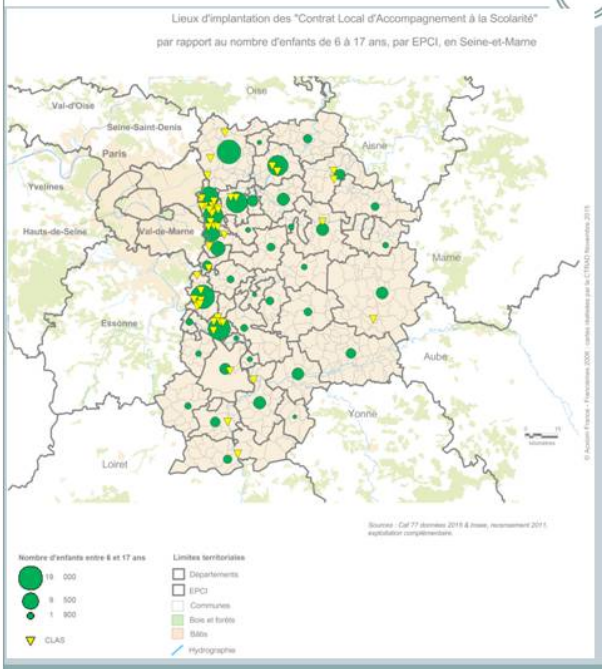
The addition of information is done in the "layout" window, which has no effect on the "map" window.



Map Case



First case

Theme map

— marks in different sizes

— dotted marks

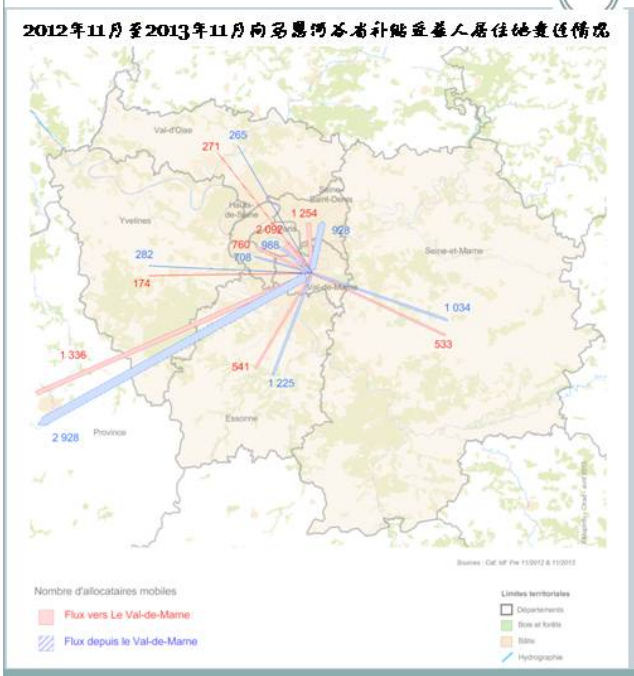
Provide different information:

— Geographic location of CLAS

— High density communities of teenagers

⇒ **The map reveals whether CLAS is located at high density communities of teenagers.**

Map Case



Second case

Dynamic map

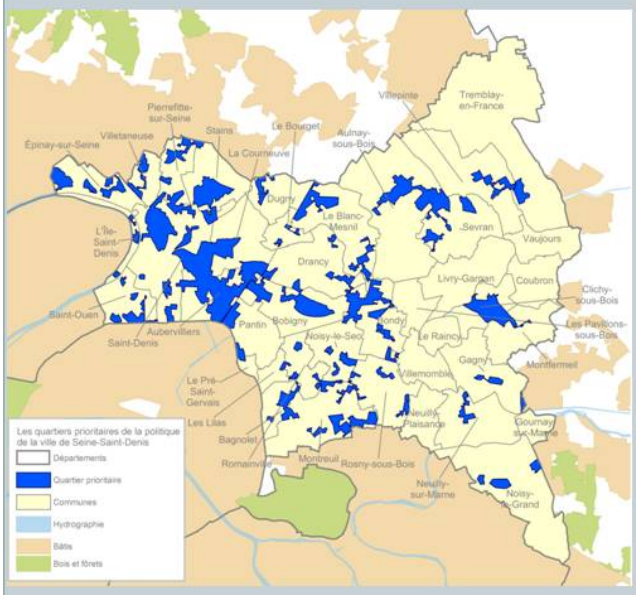
- Through flowing marks

Provide information

Recognize the attraction of different regions to citizens

⇒ **The map reveals how many families move and where they relocate within one year.**

Map Case



Third case

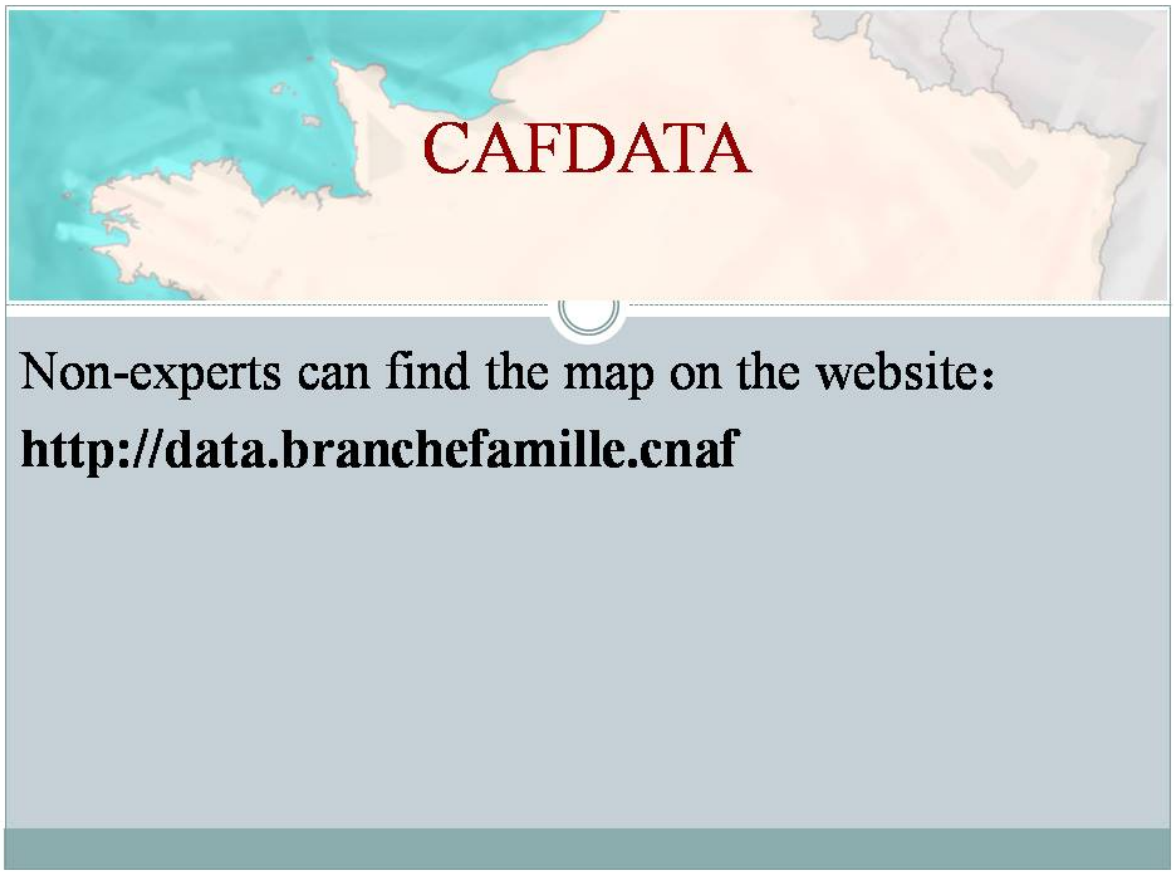
Theme map

- Single numerical value

Provide different information:

Recognize the geographic location of key regions

⇒ **The geographic location of key regions is at a glance.**



CAFDATA
Non-experts can find the map on the website：
http://data.branchefamille.cnaf

Vision
Develop big data tool
与法国统计局INSEE合作，展开市级以下的地区分析 Cooperate with French INSEE
Develop large data toolsWork with the French Bureau of Statistics INSEE to carry out regional analysis below the municipal level
